**Project:** Guadalupe Creek Fish Ladder

**Location:** San Jose, CA

**Owner:** Santa Clara Valley Water District

**Description:** This project consisted of the construction of a cast in place concrete fish ladder within Guadalupe Creek in San Jose, CA. The project included the complete bypass of the existing creek flows (4–10 CFS), temporary support of two existing retaining walls (circa 1928), excavation of mercury contaminated soil, the construction of a concrete fish ladder with adjustable wood/steel weirs, and the installation of 7 other wood weirs within the creek.

**Completed:** October 2008
