Project: Agua Fria, Toroges and Agua Caliente Creek Improvement

Location: Fremont, CA

Owner: Santa Clara Valley Transportation Authority (VTA)

Description: This project consisted of installing a precast UPRR railroad bridge over 3,200 CY of CIP concrete, including 1,100 Linear Feet of retaining wall and 1,200 LF of CIP Box Culvert, 250 LF precast concrete box culverts, and new inlet structures for a new 78" RCP and existing 81" RCP. The New 78" RCP was installed by micro tunneling under active UPRR tracks. In addition, C-QC installed 1,000 TF of UPRR track with 2 turnouts.

Completed: February 2013
